Ground report after winter

Summary

18th of May

Condition of the building after winter

The main school building is kept well after the winter there is no crack no damages, campus fencing are intact over all observation is very good.

There is no leakage happen from the roof the winter care taker Mr look after the building very well

Water scarcity in Zanskar

Weather keep fluctuating very hot to windy upto 70Kmh, cold and grey in the evening.

Due to dry winter zanskar is facing water shortages all canals are dry some villages wish to remain unplough their fields and hoping for snow or rainfall, Monks are praying for the same.

Watering the Trees,

We fill up the water tank 500 liters each with the help of generator and motor & bring it from 8 Km distances which repeat for several times to complete the watering process,

Mr. Norboo holding the motor, the entire watering process are being helped by him.

Water release from the tank and being followed along the plantation.

The condition of Plants.

But Most of the plants which was planted last autumn are drying up from the top only due to minium snowfall and lack of water, our efforts are continue to keep alive as many as possible.

Willow & poplar which ws planted last spring are growing well started to sprout out leaves but need to water as often as possible.

Well growing plants just behind the school building.

Next steps

Waiting for Labour as soon as labours reach Zanskar the remaining works will be start, for the time being it's cold and dry but soon there will be change in weather and hoping to have water follow in canals. We are preparing the ground and arranging different necessary things for the coming working session. Thank you all,
